# Unique lighting you'll fall in love with

For more than 40 years we have been manufacturing lights that are always at the cutting edge of design. Our products are unique, functional and replete with poetry; and they always help to generate the perfect atmosphere for every occasion, whether indoors, outdoors or in urban spaces. We adapt our products to the particular needs of each project in order to offer technical and aesthetic solutions that allow us to dream of spaces that are more and more beautiful and better lit.

# Design as our identity

We entrust the design of our collections to the best creative professionals, generating synergies that result in timeless, functional and emotionally charged luminaires that allow us to connect with people through the light they generate.

We develop special made-to-measure projects, without limits and always seeking to solve any challenge that comes our way. We help interior designers and architects to meet their challenges, giving light to their ideas.

# The essence of our land and its traditions

We work from an enclave located in the heart of nature, where we combine innovation and tradition with an offer that fuses technology with the best artwork.

We are deeply rooted in our environment.

We are heirs to the traditional values of our land and to the best of its industrial character, such as commitment and satisfaction in the face of a job well done.

# Commitment to what is natural

Our environment has given us everything and, to preserve this tremendous asset, we comply with the highest standards of production control and waste management. Ninety per cent of the raw materials we use are of Spanish origin and we use wood from controlled forests that meet the sustainability criteria established by the PEFC. This is just a small example of the many measures that we have taken to raise B.lux to the level of an industry with a present and future committed to nature.

# Control, trust and effort

Our products are distributed in 65 countries on five continents. This outstanding international presence is possible thanks to the rigorous control of the manufacturing and distribution processes to which we subject our luminaires, allowing them to meet and exceed the most demanding quality standards. We are committed to long-lasting relationships based on trust between manufacturer and customer. Our success is based on a slow growth, sustained over time, which advances with secure steps. There are no secrets – this is the natural result of our team's dedication and talent focused on offering the best service.

# Thinking about your needs

One of our priorities at B.lux is to make your job easier. With this objective in mind, we have developed an online configurator for lighting systems that allows users to design the lighting according to their interests, helping them to understand the chosen system and facilitating the definition of the necessary components for each installation. In short, another step further in our commitment to solve your needs and offer you valuable services.
