### PRODUCT OPTIONS

This creation will be released in four versions representing the four seasons. Other options are available under request.

The Special Tree sideboard is a redesign of the original cabinet with the same name. Featuring the Summer season, three types of exotic roots in their natural color in high gloss finish cover this empowering creation while the interior remains in satinwood. The base and the tree trunks are in oxidized brushed brass and, in the center, the most special tree preserves the subtle carved jewelry work with the name of the creation as well as small wavy brass 'branches' lifting the interior glass shelf.
