a-collection

Fran Silvestre

El diseño de A-COLLECTION surge de la relación entre dos elementos. Por un lado, la estructura portante metálica de perfil cuadrado con la mínima expresión y geometría ortogonal que da estabilidad a la pieza.

Por otro lado, se encuentra la carcasa de madera con una geometría orgánica que garantiza el confort y la ergonomía de la pieza.

Quizás, dé suerte sentarse tocando madera.

A-COLLECTION design is born by the relation between two elements. On the one hand, the structural metallic frame made of a minimal-squared profile with an orthogonal geometry which ensures the piece's stability.

On the other hand, the organic geometry of the wooden chassis provides comfort and ergonomomy to the piece.

Maybe, sitting down touching wood brings good luck.
