LAMP:	G9 ; 2x25W max.	G9 ; 2x25W max.

The Tree Branches wall lamp handcrafted in hammered patinated brass is a conceptual approach, designed to recreate the sunbeams that pierce the density of forests. The clean lines of this stylish piece have the same technique of the original side table, using a more detailed approximation as if we were closely looking to a single branch that hides us from the sunlight while we stand in its shadow. Therefore, the light only appears on a secondary plan, brightening the wall around it.
