STORY

*We all seek a path to go through, a place to discover.
That personal goal to reach...
But sometimes we need to look back
and return to the place that shows us what we're made of.*

*A safe place behind closed doors.
A place called...*

Homeland

PRODUCT DETAILS

Homeland represents the values of the place where we are born; a safe and protective place. Recreating the image of an ancient cottage, with irregular walls covered with whitewash, Homeland is a piece that results from a thorough handmade work.

WHITE EXTERIOR AND INTERIOR Integrally covered by hand, the outer irregular blank matte finish is surprising by the high quality of his satiny touch and each piece turns out to be unique, endowed of by unrepeatable details. The interior features four shelves with matte finish and two top drawers lined with white velvet, one of them a cutlery drawer.

CENTRAL DOORS AND INTERIOR The two pivoting doors and frame are painted metal construction, finished with a half gloss varnish, opened to a central space that interprets the meaning of the interior of a house. Symbolizing the warmth of affection in the splendor of a home, an intense gold lights the painting in earth tones with a high gloss varnish finish. This space includes two shelves with the same finish.

The design and product engineering of almost all the parts used in Homeland are responsibility of INSIDHERLAND and its implementation is made by Portuguese craftsmen and companies.
