

FUGA MEDIUM version is a family of tubular format projectors. They can be adjusted in their 350° vertical axis and in their 90° horizontal axis. All the components are housed inside the projector case, obtaining a clean design. The projectors distribute light to where it is needed, since they can be directed. A Colour Rendering Index of 95 provides a realistic rendering of the colour. The higher the value, the better the human eye perceives the real colour of the objects it lights. With a colour temperature of 4000K, this projector is suitable for lighting work spaces.
