# Hamster Bookcase

In the last years, library interior designers have introduced strong  
r into schemes, not only on soft furnishings but on bookcases  
bookshelves, moving away from the traditional wood finishes that  
reading for pleasure is not only recognised but celebrated and  
rary services are reflecting this with a new confidence in dynamic  
and buzzing spaces. Finding a balance between creating a vibrant  
colour scheme with broad appeal but which will not feel dated two  
years down the line is important. At Opening the Book we  
our theory to create schemes that are appropri-  
to currently on trend.

“Elegance...a matter of attitude.”

make them talk

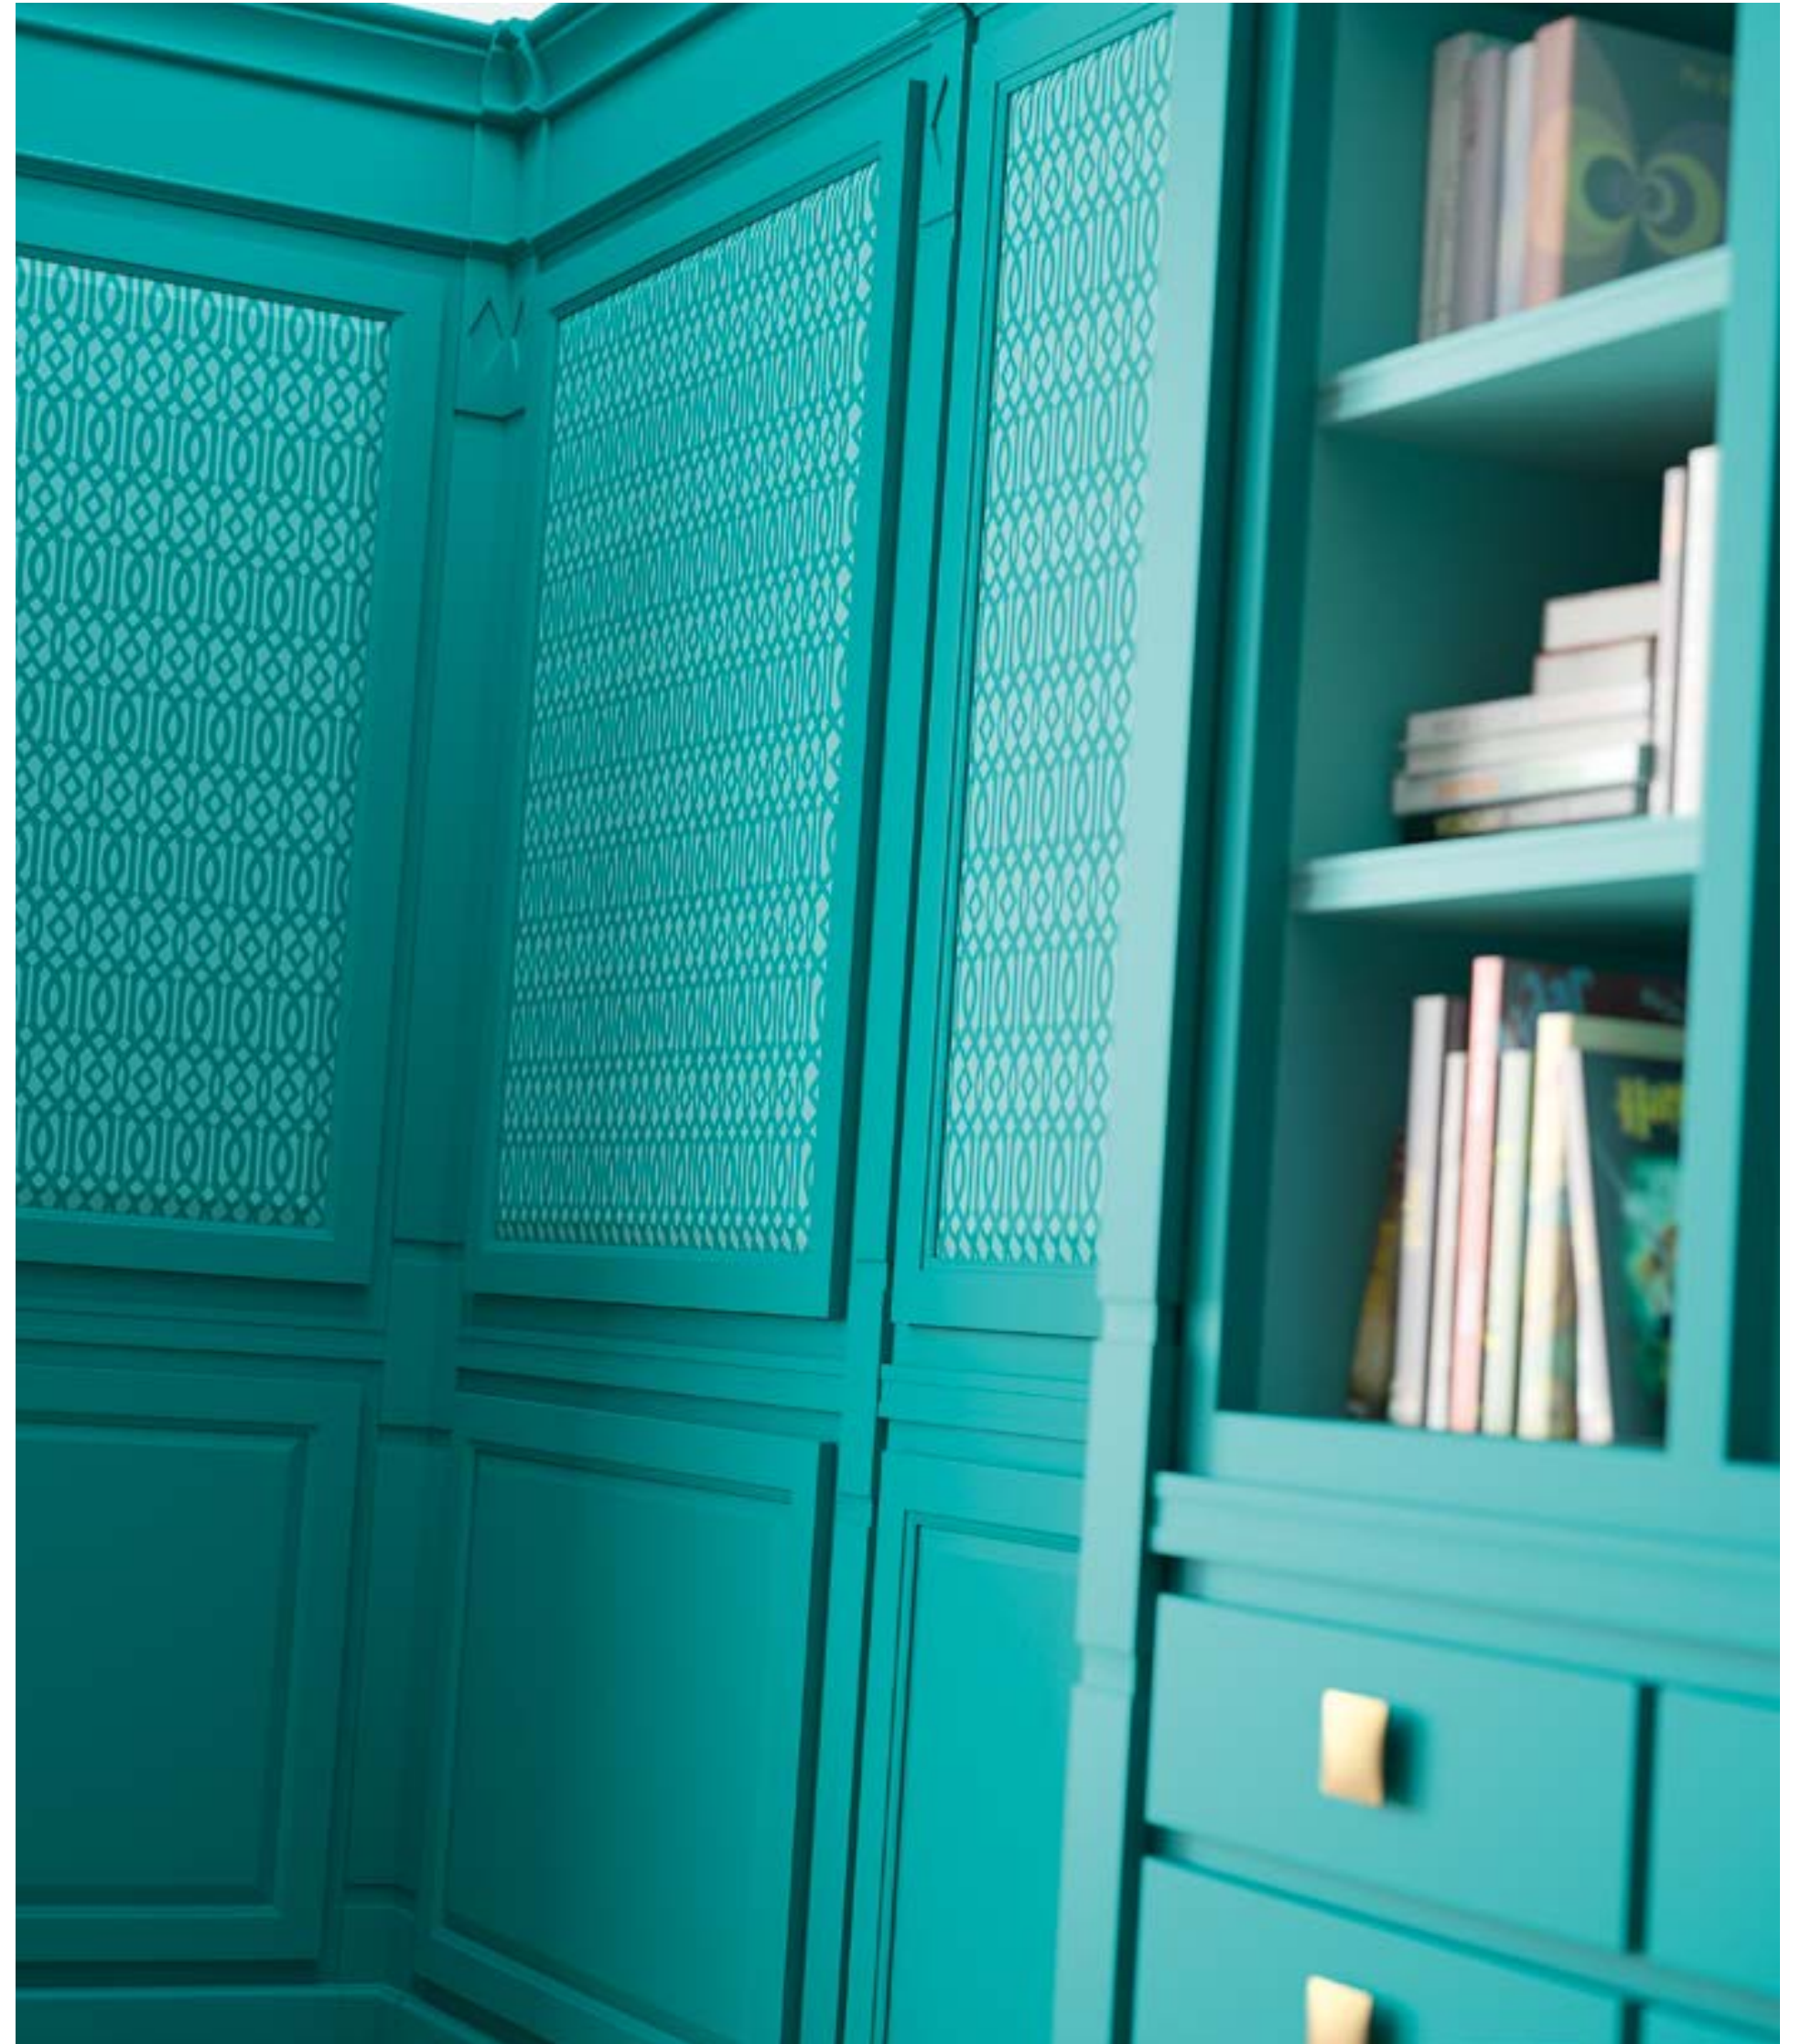

There are no rules

## Don't keep calm because calm is boring

We bring creativity and attention to detail to all our interior schemes, creating designer finishes by using budget-friendly carpets and fabrics, adding lamps, cushions and rugs for a luxurious feel. As libraries strive towards creating environments that not only provide all the elements expected of a 21st century service but also position themselves as the heart of the cultural life of a community, school or college, it has become more important than ever to make space for people to rest and reflect in comfort, alongside the bookcases, reading areas and study desks.

**“the difference between fashion and style is the quality.”**

Although talented designers are more than willing to experiment with just about any color palette, there are some color favorites. Country cool grays and bold reds among their preferred hues, these experts are specific not only about the perfect shade but also about the room it works best in. Here, designers reveal their favorite colors and what inspires them to pick one tone over another to create just the right mood. It's about all the inspiration you'll ever need to never paint a wall wabeige again. Peacock blue has a luminous quality about it that nature does so well—the feathers of a peacock seem to shimmer and glow. Find peacock lacquer or high-gloss paint in the most seductive way to create a striking, enveloping space that captivates and inspires.

Stick to the things you really love

# Making real your ideas

for hats, shoes, bags...whatever!

Colour is an extremely personal and emotional thing: everyone has a favourite and/or a colour they detest - and they won't be shy about expressing their opinion. The role of the interior scheme as a marketing tool, therefore, can be invaluable in overcoming personal prejudice to build towards an agreed scheme that embodies the values and intentions of the library service as a whole.
