ATRIA COLLECTION

by Gabriel Teixidó

capdell

Collection of the acclaimed designer Gabriel Teixidó.

It is a chair with a high level of craftsmanship, its solid oak wood structure is made up of 15 pieces of wood that are assembled by tufts. Two D.12 metal rods are screwed onto this solid wood structure that serve as support for the cover. Possibility of chair with arm and without arm.

The seat and backrest are made of a leather cover with the extreme parts of the cover sewn, with painted edges for a high-quality and perfect finish. The other halves of the sheath are closed like a corset, with eyelets and a 4mm diameter nylon cord. The part of the eyelets is internally reinforced with stainless steel plates, to keep the bag flat and not deform with the tension of the stringing.

The leather is a special skin, not oiled, so it maintains tension, does not deform and is very resistant. It has an internal reinforcement of recycled plastic for greater stability of the skin. The back of the case is marked, with a dry blow, the Capdell logo.

Very robust and light chair, easy to move and manipulate. Its design and production demonstrate the know-how of generations of artisans dedicated to the wood industry with numerical control technology.

Being a chair with a cantilever seat and back, that is, the cover itself supports and welcomes the user, provides a very comfortable seat, and molds to the user.

The Atria Collection is a very sophisticated product, with luxury finishes and top quality. The structure is available in natural or S85 (Dark Brown) stained oak. The seat is made of leather available in cognac color. It is a very resistant indoor collection, designed for sophisticated and well-kept spaces, with a very careful aesthetic. This chair can be used for residential, contract and hospitality.
