## OUR PURPOSE

“Faro Barcelona exists to contribute to the wellbeing and happiness of people through design and the relationship we establish with the objects that surround us in our daily lives. We believe in honest and accessible design. Design for everyone.”

Xavier Martin  
CEO

## A BRAND WITH SOUL

“We believe in the power of enthusiasm to move forward and surf the waves the best way we know while enjoying the process and radiating light around us.”

# SUSTAINABILITY

Our sustainability journey focuses on two main objectives: reducing our negative impact on the planet and maximising our positive social impact.

## People

### The value of a great team

At Faro Barcelona, sustainability starts from the inside, taking care of the well-being and personal growth of our team.

### Equality and diversity

At Faro Barcelona all people are great and equal, whatever their gender, age, religion or sexual orientation. Women, as well as men, play an important role: 76% of our team and 49% of our leaders are women.

### Community support

For over a decade, we have been collaborating in social projects of foundations providing our help to ensure a better quality of life for the people helped by these organisations. Since 2008, we have had our own social project with Hook, each luminaire sold feeds a child in Africa for one year.

### Supporting new talent

We collaborate with universities and design schools to help new talents emerge into their professional development. Projects such as Reborn, a second life for waste (La Llotja), make It design with 3D printing (CIM UPC), are some of the collaborations we have carried out.

### Social innovation

We take part in disruptive social innovation research and develop products and services that solve social problems such as the ageing of the population. We have a positive impact on people's quality of life, contributing to their well-being and comfort through quality, accessible and sustainable lighting and design.

## Planet

### Sustainable packaging

Our packaging is made of recycled cardboard boxes printed in one ink and without staples to ease the disassembly and the right recycling.

We have eliminated single-use plastics and replaced them with recyclable paper bags and we use recycled cardboard shavings to protect the product during transport in 60% of our shipments. All our packaging meets Drop Test ISTA-2C quality standards to ensure products arrive in perfect condition.

### More sustainable logistics and transport

We have optimised the packaging size of each product to reduce the amount of packaging material and the carbon footprint of transport. We have opened a new logistics centre in China to supply our Asia-Oceania market in a more sustainable way and reduce carbon emissions from transport.

### Sustainable workspaces

We use green electricity in our offices. We produce 70% of the energy we consume with our own photovoltaic installation, ensuring that the energy is from renewable sources. In addition, our headquarters are designed to maximise the use of solar energy and natural light.

### Supporting new talent Team committed to sustainability

At Faro Barcelona we have an internal sustainability committee that promotes different sustainability actions and monitors them.

## Product

### Sustainability from conceptualisation

In our eco-design decalogue we set out the main guidelines we follow to make our designs more sustainable. We work with external consultants to reduce the environmental impact of our production processes, guaranteeing the quality and safety of our products. We are training our design team in circular design techniques for the more sustainable development of all our products.

### A longer useful life

We work to design timeless, repairable and long-lasting products in order to reduce their environmental impact. We research new methods to ensure that our designs last longer, are easy to repair and can be recycled.

### Standardisation and modularity

We work on the standardisation of components for a more efficient use of resources and more sustainable production. We develop modular collections that allow us greater versatility and more efficient logistics and transport.

### More sustainable processes and materials

One of the major challenges towards a more sustainable production is the choice of materials as it represents more than 70% of the product's carbon footprint. The use of recycled materials or materials with a lower environmental impact, the implementation of new techniques and the reduction of the number of materials used, help us achieve more sustainable manufacturing.

### Control of the supply chain

We share our sustainability vision and commitments with all our suppliers. We, therefore have a supplier code of conduct to ensure a more sustainable supply chain.

## CARBON FOOTPRINT CERTIFICATION

We have achieved certification of our carbon footprint calculation in accordance with the ISO 14064-1 international standard, a major milestone on our path to sustainability.

Thanks to this certification, we know the real volume of greenhouse gas emissions generated by our activity and it allows us to identify areas for improvement and implement compensation strategies through different programs.

We celebrate that we have successfully passed the sustainability audit carried out by EcoVadis, obtaining the prestigious Medal in recognition of our sustainability efforts and achievements.

Both certifications reaffirms our ongoing commitment to sustainability and corporate responsibility in all its facets and operations.

DESIGNERS  
ARTISTS  
CREATORS

They make our world a better place thanks to their ingenuity, talent and creativity.

Espacio Princesa  
Princesa 52 Barcelona

The creativity, ingenuity and design of Faro Barcelona can be found in the heart of the city. Welcome to Espacio Princesa!

Request visit

Docontract MAD  
Velázquez 35-4ºD Madrid

This innovative space has emerged with the purpose of simplifying the work of architects, interior designers and developers looking for solutions for their new construction or renovation projects.

Showroom París  
7 Rue d'Uzès Paris

A space in which to carry out commercial activities such as visits, product demonstrations and meetings, and to develop a calendar of scheduled events to experience first-hand the design concept in lighting and ceiling fans.

## SHOWROOMS

We planned it to be the meeting point for designers, interior designers, architects and creatives to share their concerns and create a whole experience.

At Faro Barcelona, we control the quality of our products and services from conception and design to functionality and reliability tests.

Our quality management system is based on ISO9001.

Compliance with electrical safety regulations under EN60598 and energy efficiency ERP.

# Highlights

Anti-glare visor accessory ref. 75714-2

The design of the projector allows the light to be directed 360° on vertical and horizontal axes.

Move the product along the structure by adjusting/unadjusting the side screw.

Clip accessory included with each projector, allows the cable to be routed and fixed to the structure of the product.

The shade accessory allows for indirect lighting effects and a more decorative appearance. Lampshade ø310 ref. 75707-2 and lampshade ø400 ref. 75706-2

# Totem

Design Roger Vancells

Totem 611 75552

Totem 285 75551

Its simple, rounded lines form a compact, brutalist-inspired form that seeks to emphasize the expressive nature of its material, giving prominence to the natural concrete from which it is constructed.

# Shadow

**Design** Àlex & Manel Llusçà

Shadow reinvents the concept of garden beacons. Place several pieces along a path and you'll get an amazing effect.

# PROJECTORS & SPIKES

# Puk NEW

PUK is the optimal solution for outdoor lighting that combines aesthetics and technology perfectly. Specially designed for architectural spaces, it is distinguished by its recessed light source, guaranteeing high visual comfort.

**FINISH**

● Black

**COLOR TEMPERATURE**

**BEAM ANGLE**

**ACCESSORIES**

# Highlights

Goniometer built into the luminaire arm for more precise aiming of the floodlight at the desired angle.

Recessed light source, optics available in 3 different aperture angles.

# Accessories

Optional visor to optimize glare control.

Refs. 75300V / 75302V / 75303V

Optional honeycomb accessory, to reduce glare.

Refs. 75300H / 75302H / 75303H

Fix PUK series directly from its base to the ground or, add the concrete fixing accessory (ideal for semi public areas).  
Ref. 75302F

Puk tree accessory adapts this versatile projector series for tree use. Adjustable straps avoid damaging the tree branches as they grow.

Refs. 75300F & 75303F

Use PUK projectors on the ground by adding the spike accessory.

Refs. 75300S / 75302S

# RECESSED

Falls is a floor recessed luminaire in linear format that stands out for its exceptional robustness. Available in two versions, it offers versatile lighting for different design needs.

The Falls luminaire has an orientation system that uses a goniometer, allowing precise adjustments in the direction of the light. This mechanism provides the flexibility to adapt the lighting precisely to the preferences and needs of the environment.

Falls 290 Orientable 71731

This version has a swiveling optic, ideal for accent lighting or as a light washer, allowing to highlight specific elements of the environment with precision.

outdoor

Recessed

Equipped with opal optics, provides soft and uniform general lighting, creating cozy and elegant environments.

Tras is a family of floor recessed luminaires with intensive optics, available in three sizes. Its black interior finishes, combined with a full glass enclosure, give the family a distinctive elegance.

Tras 25L 71716

Tras 2L Orientable 71701

The smaller version of Tras offers the possibility of orientation up to 30 degrees without the need for tools. This is achieved by means of a rotary knob that, together with the degree screen printing on the optics, allows precise and easy orientation.

# Crosby

Curtis 70462N

Curtis follows the same minimalist line as Crosby, but with an asymmetrical optic for illuminating details in a vertical plane or for generating striking effects on walls.

Crosby 70459N

This luminaire not only provides efficient signaling, but also stands out for its unobtrusive format. Acting as a signaling luminaire in its own right, it offers a comprehensive solution for signaling needs in a variety of environments. In addition, a low-voltage version is available, perfect for wet applications where a safe power supply is required.

Lio 71495

Lio, on the other hand, is the ideal choice for signaling walkways.

Tecno and Lio are the ideal choice for those applications where integrated LEDs are not required and an interchangeable lamp is preferred.

Tecno 71489N

Tecno, with its GU10 option, offers architectural lighting possibilities by allowing optics and color temperatures to be defined with the lamp itself.

# Edel

Equipped with a 30-degree optical block, it offers an ideal lighting package for perimeter lighting of pools of all sizes.

# Dart

The Dart family stands out for its exceptional versatility by offering both recessed and surface-mounted options.

Dart SQ 70272 + 70274

Available in square and rectangular formats, its design is distinguished by a white or black glass front with no visible hardware, giving it an aura of elegance that makes it the ideal choice for illuminating passageways, stairways or perimeter areas, both indoors and outdoors.

Sedna SQ 140 70148

Available in two formats, square and rectangular, it brings both functionality and aesthetics to outdoor spaces where specific and quality lighting is required.

Sedna is an outdoor recessed designed for signage. Its slightly curved design, together with its high IP protection rating and die-cast aluminum construction, makes it an excellent choice for low-power signage lighting.

TRUE BEAUTY  
RESIDES  
IN SIMPLICITY.  
IN EVERY SMALL  
MOMENT WE  
DISCOVER  
THE EXTRAORDINARY.
