

IMASOTO®

hit the office!

The European leader in office/contract furniture

Since 1969

Creating technical furniture solutions for professionals and creative minds

IMASOTO is a company that was established in Madrid in 1969, and since then we have been synonymous with passion for quality, furniture, design and architecture.

With 10,000 m² of design, production and export facilities, we are Spain's leading manufacturers of technical furniture for architects. Leadership forged over decades in solutions for offices and schools and contract and home furniture

In 2008 we launched the **AVP (Architect View Products)** range of products, a new style of product with a signature design that follows architectural criteria, in line with Spain's biggest international designers.
(Red · www.red-aede.es)

Products that are conceptually linked to the creative philosophy of the company's founder, Francisco Soto, a pioneer in the development of furniture for architects.
